

# Sustainable Procurement Vision

Our goal is to **anticipate regulations** related to Supply Chain Due Diligence and market needs while promoting the **BOBST Industry Vision** and the **BOBST Values**.

We endeavor:

- to build a value chain that promotes **recycling, long life cycle** and **energy efficiency**;
- to seek **innovation** that will bring value to our customers;
- to limit the **Corporate Social Responsibility risk exposure** within the whole supply chain, with a special focus on human rights; and
- to take actions to improve the **environmental** and **social impact** of our supply base.

We commit to integrate in our Sourcing Process the sustainability level of our suppliers as a key business driver.

Bobst Group SA, October 2023
